How To Play

Litter

Battle

1. Begin by placing your 5 litter tokens (one per square) anywhere on the grid.
2. The player who is younger may begin first by calling out a coordinate on their opponent's grid (Example: "B3")
3. The opposing player checks the coordinate: if there's a token, they say "Litter found!" and give the piece to the other player. If there is not litter in that coordinate, they say "No litter there!" and it becomes the other player's turn to call out a coordinate.
4. Continue taking turns, calling out coordinates to locate litter.
5. The first player to find and pick up all 5 of their opponent's litter tokens wins the game!

Good luck!
